

Difference-in-Differences Estimates by Entity Group and Event Type

Robustness: PostEvent equals 1 from relative week -1

	All events	Political events	Terror events
All entities	-0.074*** (0.023)	-0.107*** (0.036)	-0.040 (0.030)
Political parties	-0.145* (0.076)	-0.264** (0.123)	-0.020 (0.065)
Organizations/people	-0.049** (0.023)	-0.060* (0.035)	-0.040 (0.033)

Cells report the PostEvent coefficient.

Notes: Dependent variable is log weekly spending. PostEvent equals 1 for relative week ≥ -1 . All models include entity and data-source fixed effects; stacked models also include event fixed effects. Sample is restricted to Sunday-start weeks from 2020-01-05 through 2025-12-28. *** $p < 0.01$, ** $p < 0.05$, * $p < 0.10$.
