

Difference-in-Differences Estimates by Entity Group and Event Type

PostEvent coefficient; standard errors in parentheses

	All events	Political events	Terror events
All entities	-0.061 (0.052)	-0.042 (0.075)	-0.104 (0.067)
Political parties	0.100 (0.196)	0.252 (0.287)	-0.053 (0.203)
Organizations/people	-0.091. (0.052)	-0.091 (0.072)	-0.108 (0.072)

Cells report the PostEvent coefficient.

Notes: Dependent variable is log weekly spending. PostEvent equals 1 for relative week ≥ 0 . All models include entity and data-source fixed effects; stacked models also include event fixed effects. Sample is restricted to Sunday-start weeks from 2020-01-05 through 2025-12-28. *** $p < 0.001$, ** $p < 0.01$, * $p < 0.05$, . $p < 0.10$.
