

Difference-in-Differences Estimates by Entity Group and Event Type

PostEvent coefficient; standard errors in parentheses

	All events	Political events	Terror events
All entities	-0.087*** (0.022)	-0.176*** (0.036)	0.016 (0.031)
Political parties	-0.140* (0.077)	-0.337* (0.165)	0.050 (0.064)
Organizations/people	-0.059*** (0.022)	-0.125*** (0.033)	0.016 (0.033)

Cells report the PostEvent coefficient.

Notes: Dependent variable is log weekly spending. PostEvent equals 1 for relative week ≥ 0 . All models include entity and data-source fixed effects; stacked models also include event fixed effects. Sample is restricted to Sunday-start weeks from 2020-01-05 through 2025-12-28.

*** $p < 0.01$, ** $p < 0.05$, * $p < 0.10$.
