

Difference-in-Differences Estimates by Entity Group and Event Type

PostEvent coefficient; standard errors in parentheses

	All events	Political events	Terror events
All entities	-0.059* (0.030)	-0.063 (0.062)	-0.061 (0.039)
Political parties	0.041 (0.085)	0.213 (0.234)	0.005 (0.156)
Organizations/people	-0.078* (0.032)	-0.111. (0.060)	-0.070. (0.041)

Cells report the PostEvent coefficient.

Notes: Dependent variable is log weekly spending. PostEvent equals 1 for relative week ≥ 0 . All models include entity and data-source fixed effects; stacked models also include event fixed effects. Sample is restricted to Sunday-start weeks from 2020-01-05 through 2025-12-28. *** $p < 0.001$, ** $p < 0.01$, * $p < 0.05$, . $p < 0.10$.
